# SERVICE OFFERINGS

## IT SERVICE MANAGEMENT (ITSM)

Using market leading tools, technologies, and best practices, we provide world-class enterprise IT Service Management (ITSM) solutions that meet complex service delivery requirements. Key services include:

- Baseline ITSM Maturity Assessments based on ISO/IEC 20000
- ITSM Software Selection, Implementation, Integration and Management
- Digital Workplace Portal Development and Service Catalog Design, Development and Automation
- Asset Discovery and CMDB Design and Development
- Asset Acquisition and Procurement Lifecycle Design and Development
- Software License Management Solution Design and Development
- Performance Metrics Identification, Reporting, and Dashboard Development
- Data Center Consolidation, Cloud Migration, Management and Support
- Organizational Change Management

## MOBILITY ENGINEERING AND MANAGEMENT

G2SF helps agencies improve operational effectiveness and efficiency by facilitating the transformation of the workforce to mobile computing. By leveraging market leading technology, G2SF designs, develops, implements, integrates, manages and improves enterprise mobile solutions that provide global access to critical information in a secure manner. Key services include:

- Mobility requirements and scope definition and documentation
- Mobility policy, process, and procedure development, documentation, and management
- Mobile application research, selection and implementation
- Mobility network consulting, engineering and configuration
- Mobility device (asset) lifecycle, carrier and expense management
- Mobile security and cloud storage integration
- Mobility service desk and user profile management (e.g. VIP)

## SECURITY ENGINEERING AND MANAGEMENT

G2SF leverages market leading cybersecurity tools, technologies, and techniques to proactively monitor, track, report and ultimately prevent unauthorized access to agency infrastructures. We research, design, implement and manage processes, procedures, architectures, and best practices to detect, defend, respond, and quickly resolve in/outside security threats and incidents. Key services include:

- Security Management Services and Security Operations Center (SOC) Management
- Security Assessment, Design, Development, and Implementation
- Data Loss Prevention (DLP) and identifying Agency PII and Sensitive Data (CUI, PII, HIPAA, etc.)
- Cloud Access Service Brokers (CASB) and Computer and Mobile Device Forensics
- VPN, Cryptography and Data at Rest Encryption Services
- Next Generation Anti-Virus, Malware, and Sandbox Operations
- Security Incident and Event Management Services with External Party Management
- Enterprise Logging, Audit Reduction and Accountability Services
- Security Weakness, Threat Detection, Vulnerability and Compliance Scanning
- Micro-Segmentation and Zero Trust Model Design and Implementation
- Risk Management Framework, Information Assurance, Certification and Accreditation (C&A)
- Business Continuity Planning, Continuity of Operations, Disaster Recover Design and Operations

## IT ENGINEERING AND INTEGRATION

G2SF leverages industry and agency specific best practices such as DevOps and AGILE to engineer elegant IT solutions that meet well-defined technical and business requirements in the most efficient manner. Key services include

- Network, systems, and software requirements definition, design, engineering, implementation and integration
- Data center consolidation and cloud migration
